

AT02 2G

GSM/GPRS

Device Feature

Low consumption

Time interval configurable¹

Firmware customization

“A very small device to keep eyes on your valuable package”

	28g		50mm x 35 mm x 17 mm
	300mAh(Li-polymer)		Operating temperature (-10 ~ 60C)
	2G antenna inside		GPS antenna inside
	DC 5V (normal phone USB charge to charge battery)		

AT02 2G is designed for package tracking, pet tracking, older/kids tracking and other asset tracking . AT02 unis is a very small unit that can be hidden easily.

1. Time interval configurable: the time interval should be configured before tracking. because the unit will always in low consumptin mode, so it will be very hard to capture the time window to send the SMS to change it.
